

Technical Features

Heavy duty mixer, specially designed for accumulator paste mixing.
Mixing container and mixer blades rotate in opposite directions.
Intensive mixing.
Uniform paste density throughout the mix.
Efficient cooling prevents elevated temperatures of the paste by external water cooling
Quick and easy change of mixing container.
Lifting-off carriage and 4-wheeled carrier for handling the mixing containers.
With 2 mixing containers the machine can be operated continuously.

Optional

Extraction & Cooling Fan mounted on the machine frame,
connected to hood by flexible tubing.

Technical Data

| | | |
|-------------------|---|--|
| Capacity | : | abt. 250 Kgs of paste per charge. |
| Mixing time | : | 30-45 minutes/charge. |
| Electric supply | : | 3 x 380 Volt, 50 Hz, or to specifications. |
| Mixer motor | : | 4 kW, fan motor : 0.25 Kw. |
| Overall dimension | : | 1350 x 750 x 2000 mm. L x W x H |
| Weight | : | 1050 Kgs |
